

FUEL SYSTEMS

CONNECTORS FOR FUEL LINE, WINDSHIELD WASHER HOSE AND VACUUM TUBING

(Product type 7315)

Gates connectors are recommended for small-diameter hoses to provide a better seal between hoses with either the same or different inside diameters. Using straight, elbow, reducer, "T" and "Y" shapes, almost any hose configuration can be constructed.

- > Unique single-barb design ensures a leak-proof seal
- > Resistant to coolant additives, petrol, diesel, oil and LPG
- > For hoses with ID of 2 mm to 12 mm
- > Glass-reinforced nylon resists extreme temperatures from -65°C to +250°C
- > Working pressure up to 2 MPa (20 kg/cm²)

Packaging:

5 pieces in a plastic bag.
